install Signmaster Software from USB or CD with will you need the Serial Number supplied with the CD to activate the software. Be sure to connect the Correct Cutter when installing the driver for the Cutter.

| Croc-Cut Model	Max Cut	Boxing Identification
720 Stepper	600mm	720-ST
720 Servo	600mm	720-SV
720 Arms	600mm	720-SVA
1400 Stepper	1200mm	1400-ST
1400 Servo	1200mm	1400-SV
1400 Arms	1200mm	1400-SVA
1800 Arms	1640mm	1800-SVA

once the software is installed, it needs to be activated the install wizard will take to an activation page. Be sure you have internet access select activate and it should prompt automatically. it will also Prompt you for an email address too. This is for reference only. Keep a note of this and place inside the CD Cover. This is Just in case!

Please note if you change computer you need to deactivate the Software before changing Computers, Otherwise the software will not work the serial numbers is linked to the computer.

Open Signmaster and select new document and go **YouTube training videos on the Home page** of the software in the help section. From there you subscribe to the FutureCorp YouTube channel.

There are quite a few videos available for simple operation and configuration of the cutter.   Always do testing first before doing any big jobs and make sure you are at ease with the work you do!

if you get stuck please go to www.anydesk.com or www.teamviewer.com and install the free version for private use and give us a call. We can assist you remotely with installation.
